Information System Security Officer (ISSO)

Flexible work locations. HQ in Gainesville/Warrenton. Offices throughout Northern VA & Colorado.

Responsibilities

This position will perform the functions of the Information System Security Officer (ISSO) for multiple Department of Defense (DoD) and Intelligence Community (IC) assets. The ISSO will work under the direction of the Lead ISSO to ensure the confidentiality, integrity, and availability of multiple classified computer systems. Candidates must be knowledgeable of information technology and security principles. This is a multi-tasking environment that demands technical proficiency, customer service, communication, and organizational skills.

Qualifications

- Implements the information systems security program for assigned programs/systems in compliance with NISPOM, NIST RMF, and ICD 503 requirements.
- Applies cyber security standards including DISA STIGs, RMF security controls (SP 800-53, SP 800-171, CNSSI 1253), and Customer policies and procedures to classified computing systems.
- Performs Continuous Monitoring (ConMon) of security controls, to include audit log review and archive, security updates and patching, compliance scanning (SCAP), configuration management, account management, vulnerability management, and control status reporting.
- Assists with preparation and maintenance of security Assessment and Authorization (A&A) documentation (e.g., IA SOP, SSP, RAR, SCTM) including participation in system categorization.
- Participates in security incident response as necessary, including spill remediation, intrusion and malicious code detection and investigation, reporting, and mitigations to prevent reoccurrence.

- Coordinates with and assists other Customer security and information systems stakeholders as required.
- Helps review new Government requirements and how they can be addressed.
- Performs other duties as assigned by the Lead ISSO.

Required Qualifications

- Degree in Computer Science, Computer Engineering, Cybersecurity or related discipline from an accredited college or university
- **OR** Candidates with in depth technical/compliance experience will be considered regardless of degrees
- Active TOP SECRET security clearance w/SCI eligibility (Poly preferred).
- Security+ or DoD 8570.01-M IAM Level 1 or higher certification
- 2 years' experience as an ISSO, ISSM, or System Administrator implementing NISPOM, NIST RMF, and ICD 503 requirements.
- Experience administering the system functions including security policies and account management of information systems.
- Experience performing security audits with and without specialized SIEM tools (Splunk experience highly desired).
- Ability to work in a team environment as well as independently, demonstrate excellent problem solving abilities, be well organized, flexible, and self-motivated.

Desired Qualifications

- Experience with Splunk, Nessus, and ServiceNow
- TS/SCI with Poly Active
- Security+ certification Active

Benefits

- Small, fast-growing, family-oriented company
- Competitive Salary
- Employee Profit Sharing Plan (CSW Contributes 20% above salary)
- 5 Weeks PTO
- Unlimited Comp Time
- Benefits including medical, dental, vision, life, disability, etc.
- Frequent company trips, events, outings
